Navigator RIP Page Setup

Navigator RIP

Since 1991, the world has recognized Xitron's Navigator RIP as the industry leader. Based on the Harlequin® PostScript™ 3 interpreter, it stands unequalled in flexibility, performance, reliability, and value. Today, Navigator GPS includes the Navigator RIP Manager, which provides a desktop preview and unmatched control of jobs from start to finish.

Driving over 150 output devices, Navigator is an excellent choice for the company seeking to replace older RIP technology while enhancing the capabilities of their existing output devices. It is also the perfect cost-conscious RIP solution for new imagesetting and platesetting devices, printers and proofing systems.

Navigator RIP Manager

Navigator RIP Manager

Navigator GPS includes Xitron's Navigator RIP Manager to help increase productivity, manage your workflow, and help reduce costs.

With an easy-to-use graphical user interface, Navigator RIP Manager allows an operator to manage and control jobs from virtually any prepress workstation, unlike legacy systems with a single point of control. Specific workflow sequences can be designated and stored, greatly reducing the opportunity for human error.

The Navigator RIP Manager PDF option allows for greater control over PDF file management and will enable you to become an integral player as new standards develop and are implemented throughout our industry.

Navigator Options

We listen to our customers. Xitron's software plug-ins control output device functions and add valuable features, often eliminating extra production steps.

Navigator is designed so that you purchase the capabilities you need today, and as your business grows or your production becomes more complex, simply add the functionality you need.

Among the options available for Navigator are: Proofer Plug-ins, HDS Screening, TrapPro, Simple Imposition, and CIP3.

Support behind the Solution

Your investment in Navigator GPS includes not only the software and interface, but the expertise to make this solution successful in your business. Xitron dealers are trained and certified to support Navigator GPS. Xitron's own Educational Services Department offers Support Contracts to supplement the dealer assistance in many areas of the world via email, telephone and even onsite when required. Using advanced Internet technology, Xitron Technical Specialists are able to diagnose and often repair problems remotely. Onsite training and installation services are also available in many regions.

NAVIGATOR
GPS

› Navigator GPS is an efficient solution for small- and mid-sized printers who are looking for a dependable RIP combined with the ability to control and preview jobs from the user's desktop. Easy-to-use, powerful, responsive, and compatible with over 150 output devices, Navigator GPS also gives you the full backing and support of Xitron. We are built to help you with solutions that are not only reliable, but can be a lasting foundation for years to come. With Navigator GPS, Xitron has once again delivered on that promise.
